

RODA DE CONVERSA - PESQUISA DE IMPLEMENTAÇÃO

**DEVELOPING AN EVIDENCE BASE FOR PERSON-CENTRED MENTAL
HEALTH CRISIS SUPPORT SPACES: UNDERSTANDING REPEATED
SERVICE USE**

Danielle Postorivo (danielle.postorivo@uq.edu.au)

Emergency Departments (EDs) often struggle to meet the needs of people experiencing mental health crises. Person-centred crisis support services have emerged as alternatives, yet evidence for this model remains scarce. This research strengthens that evidence through mixed-methods analyses of repeat visitation at Crisis Support Spaces (CSSs) in Queensland, Australia.

Palavras-chave: repeat visitors of mental health services; alternatives to emergency departments; crisis support spaces; person-centred mental health services.
